

Data Science:-

-Data science is field of combination of Data analytics, Machine learning, artificial Intelligence, big data .

-It is a interdisciplinary field which includes varieties of processes.

Data Science Methodology:-

1. Business Understanding

2. Analytics Understanding

3. Data Requirements

4. Data collection

5. Data Understanding

6. Data preparation

7. modeling

8. Evaluation

9. Deployment

10. Feedback
